Product Overview

With the Stamp Converter for Gaia you can conveniently and efficiently convert stamps of the **Ultimate StampIT! Collection** to stamps which are ready-to-use for Gaia at the click of a button and extend your stamp library from a few to a 1000. One can never have enough stamps.
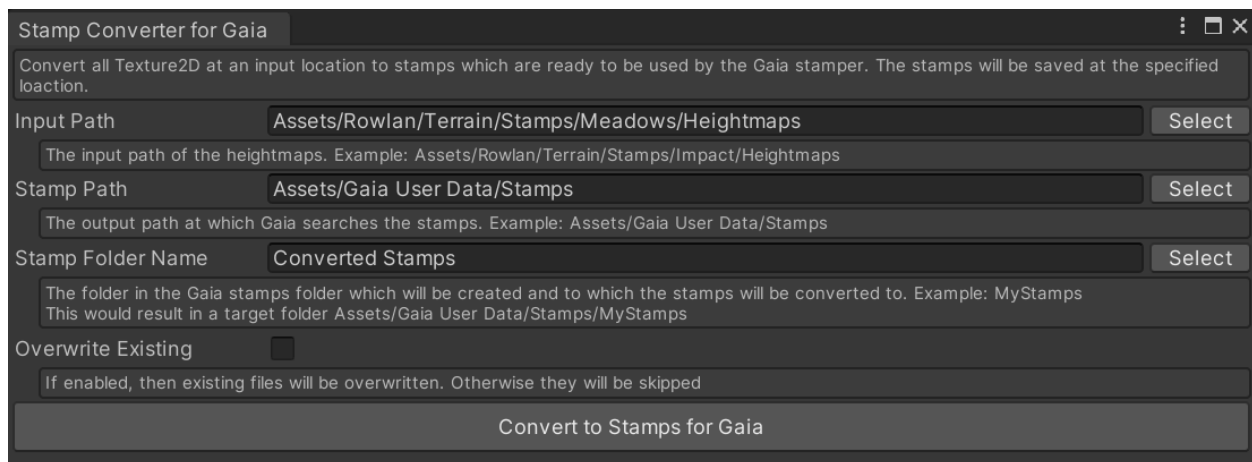

Quick Start

I tried to make the converter as convenient and flexible as possible: Select the heightmap input path and the output path, hit the convert button and be done with it. Ready to be used by Gaia's stamper.

The converter can found in the menu at

- Tools > Stamp Converter > Gaia

This opens the following dialog in which you can set your preferences and start the conversion process:

Free Stamps

If you need free stamps or just want to try my stamps before you buy them, feel free (lots of free here) to check out my **StampIT! Collection - FREE Examples** which contains more than 50 high quality textures in stunning 4K resolution.

Free Textures

In addtion to the free converter and free stamps you can also get **30+ Terrain Textures for FREE**.
